

# Transportation Regulatory Solutions

*MORE INFORMATION + WHERE NEEDED = BETTER OPERATIONS*

## Benefits:

- **Better field operations by providing the needed information remotely**
- **Better internal operations by linking enforcement actions, licenses, and owners**
- **Lower cost operations by ease of rapid information retrieval by linking all related items together**
- **Better customer service by improved regulatory operations**
- **Improved ability to respond to information requests by elected officials**

## **This is the story of one agency that is getting it all**

Working with one of the largest metropolitan governments in the US, CAVU is delivering a software system specifically customized for transportation regulatory agencies. They needed a system that would enhance their enforcement capabilities by putting all information into a single database; linking all related items together including enforcement entries to companies, key individuals, drivers, vehicles, and owners; and providing this information real time to field personnel, including photo IDs.

## **Key items of the CAVU system for transportation regulation:**

### Regulatory:

- Licensing and registrations of unlimited different item types. (Companies, Drivers, Vehicles, Medallions, Owners, etc.)
- Simultaneous tracking of numerous complicated inter-item relationships.
- Complex multilevel ownership relationships.
- Tracking of Training, Exams, and Continuing Education.
- Coordination of license application approval items.
- History! Tracking changing events and items without losing history of relationships and historical information.
- Online Photo ID's.
- Vehicle inspections.
- Easy access and visibility of enforcement related items.

### Enforcement:

- Code enforcement and investigations.
- Legal case management.
- Field access to system.
- Citations and warnings.
- Placing vehicle out of service.
- Enforcement visibility by linking enforcement activities to : Companies, Licenses, Drivers, Vehicles, Owners, and more.

### Finance/Revenue

- Fees, fines and penalties
- Blocking of licenses / permit renewals if fees owed

### Reporting

- Reporting by commissioner district, township boundaries, etc...
- Collection of performance metrics for management reports (without expending enormous amounts of labor)

**CAVU Corporation** is a leading Enterprise software firm providing superior software and data communications solutions to local governments across the US.

In 2000, CAVU developed LG-Enterprise: the first licensing, business/work permits, and tax product based solely on Internet technologies. Each year, CAVU has improved upon its systems by adding new features and functionality driven by the needs of our customers.

We are currently providing solutions for the improvement of labor-intensive tasks and implementation of eCommerce services to the public for thousands of different license types and millions of licensees, registrants, and permit holders.
